

NOTES:

1. All reflective sheeting material(s) shall be pressure sensitive ASTM Type XI 3M white 4090 diamond grade reflective sheeting or approved equal.
2. All transparent acrylic pressure-sensitive film shall be 3M Series 1177 Green Electro Cut Film (or 3M Series 1175 Blue Electro Cut Film) or approved equal.
3. Signs shall be constructed by applying white sheeting to the entire aluminum blank, then a green (or blue as required) translucent pressure-sensitive film containing the cut out street name. This method results in a white legend on a green (or blue) background.
4. Lettering shall be Clearview 1B font.
5. Signs shall be faced on .080 aluminum.
6. 6" letter height shall be used for all intersections along an arterial – these signs shall use a 9" x varies size sign blade.
7. 4" letter height shall be used for all other intersections – these signs shall use a 7" x varies size sign blade.
